

1. Personal data

Health insurance number:

Name:

Date of birth:

Date of the current visit:

Location of the current visit: Univ. Pécs ENT Clinic/ Other:

Register-PC ID:

Doctor:

Blood sample code:

Saliva sample code:

Hystolgical sample code:

2. Surgery

Date of the surgery:

The surgeon's experience: professor/ senior lecturer/ lecturer/ assistant lecturer/ specialist/ resident

The name surgery:

If ND: selND/ RND/ mRND

One side/ Both sides

selND – affected regions: (multiple choice): I/ II/ III/ IV/ V/ VI

mRND – affected: (multiple choice): VJI/ n.XI/ m.SCM

Length of the operation (min.):

Transfusion needed: yes/no

If yes, how many units?

Flap needed for reconstruction: yes/ no

If yes, type of the flap: split-thickness skin graft/ local flap/ regional flap/ free flap

If regional: pectoralis major myocutan flap/ latissimus dorsi myocutan flap/ other:

Tracheotomy: yes/ no

Nasogastric tube inserted during surgery: yes/ no

If yes, for how long?

In case of total laryngectomy, voice prosthesis? yes/ no

Other device: yes/ no If yes: HME/ Stoma button/ Larytube/ other:

Duration of hospitalization (days):

From this, time spent in the ICU (days):

Complication: yes/ no

If yes, fever: yes/ no

If yes, pneumonia: yes/ no

If yes, bleeding: yes/ no

If yes, the treatment: conservative/ reoperation

If yes, fistula: yes/ no

If yes, suprainfection of the surgical field: yes/ no

If yes, suture insufficiency: yes/ no

If yes, the treatment: conservative/ reoperation

Other?

Grading of the complications, according to Clavien- Dindo

Classification: I/ II/ IIIa/ IIIb/ IVa/ IVb/ V

Mortality: yes/ no

The purpose of the operation: curative/ palliative/ diagnostic

Histological samples taken: yes/ no

Oncological treatment before the surgery: yes/ no

If yes, what?

The summary of the epicrisis of the final report:

3. Histology

Time passed between the excision and the processing (hours):

Histology of the primary tumor:

Localization: mesopharynx/ hypopharynx/ larynx

Size of the excised tissue (cm x cm x cm):

The largest diameter of the tumor (cm):

Histological type: keratinized/ non keratinized

Differentiation (grade 1-4):

Residual tumor: R0 /R1/ R2/ Rx

The shortest distance between the tumor and the resection margin (mm):

Cartilage destruction? Yes/ no

p16 + / p16 –

Specific morphological findings for HPV:

EBER + / -

Photo documentation? Yes/ no

Neoadjuvant therapy? Yes/ no

Histology of the neck dissection:

The number of the processed lymph nodes:

The number of the abnormal ones:

Extracapsular spread: yes/ no

Neural invasion: yes/ no

Vein invasion: yes/ no
